How does elōs work?

## Safety, Comfort, Results.

Finally, Effective, Fast Hair Removal  
for Everyone.

elōs™ technology is the first and ONLY technology that effectively removes hair of all colors. The Comet™ – powered by elōs, is the fastest way to remove unwanted hair on all colors of skin, including tanned skin – with exceptional results. And with its large spot size and fast pulse rate – there is no hair removal technology that can beat the Comet's speed. Imagine legs, backs, arms – all large body zones treated in half the time.

Simply put, the Comet is proven to be the safest, fastest, most effective hair removal solution for the superior results you deserve.

The Comet is powered by elōs combined-energy technology, the newest development in hair removal. Unlike older laser and light-based technologies which use only one energy source, elōs is the first and only technology to combine two energy sources for maximum speed, effectiveness and comfort. elōs combines diode laser and bi-polar radio frequency energies to get superior results with lower optical energy output. Lower optical energy output means the highest level of safety and better comfort for you. Pulses of targeted energy isolate the treatment area and leave surrounding skin free from potentially harmful side effects.

Does elōs work for everyone?

Yes. elōs is the superior solution for removing hair of all colors on all skin types – even tanned skin.

elōs. Superior Hair Removal.
